Professional Summary

Backend Developer with 2+ years of hands-on experience, including 1 year of professional industry experience and 2 years of self-directed learning and project development. Skilled in building scalable backend systems, RESTful APIs, and cloud-based applications. Experienced in authentication and authorization, microservices architecture, database design, caching strategies, third-party integrations, and DevOps practices. Proficient in Node.js, Express.js, PostgreSQL, MongoDB, Redis, Docker, and AWS, with a strong focus on building scalable, secure, and production-ready systems.

Technical Skills

Languages: JavaScript, TypeScript

Backend: Node.js, Express.js

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, CloudFront, IAM), Docker, Nginx, Git, GitHub Actions, CI/CD

Observability: Prometheus, Grafana, Loki

Experience

Backend Developer

Quantum Communications Lab (Present)

- Built and maintained a Collaboration Suite with features including user management, workspace management, role-based access control (RBAC), file sharing, and real-time collaboration.
- Built authentication and authorization systems using JWT, OAuth, refresh token management, and Role-Based Access Control (RBAC).
- Configured Nginx as a reverse proxy and implemented application monitoring with Prometheus, centralized logging with Loki, and visualization using Grafana dashboards.

Backend Developer Intern

Common Criteria Pakistan Lab (2025)

- Developed backend modules for Inventory and Document Management Systems.
- Implemented secure file handling, access control, and Role-Based Access Control (RBAC).
- Designed and maintained PostgreSQL database schemas for scalable data storage.
- Developed RESTful APIs and collaborated with frontend developers for seamless integration.
- Supported deployment, debugging, and maintenance of production applications.

Projects

File Storage System

Live Demo — Repository

Node.js, Express.js, MongoDB, Redis, AWS, React.js

- Built a scalable cloud file storage platform with secure upload and retrieval functionality.
- Integrated AWS S3 for storage and CloudFront for low-latency content delivery.
- Implemented OAuth authentication, JWT, and Two-Factor Authentication (2FA).
- Integrated Stripe for subscription management and secure payment processing.
- Improved performance using Redis caching and session management.
- Automated deployments using GitHub Actions and AWS EC2.

EDOP – Enterprise Distributed Order Pipeline

Live Demo — Repository

Node.js, Express.js, PostgreSQL, Elasticsearch, RabbitMQ

- Developed a microservices-based order management platform using Node.js and PostgreSQL.
- Built an API Gateway for routing, authentication, authorization, and request management.
- Developed independent services for Authentication, Orders, Inventory, Payments, and Notifications.
- Implemented RabbitMQ for asynchronous communication between microservices.
- Integrated Elasticsearch for high-performance product search and Stripe for payment processing.

Education

PMAS Arid Agriculture University, Rawalpindi

Bachelor of Science in Computer Science

2025
