

Muhammad Zohaib Malik

Backend Developer

+92 332 5187445 muhammadzohaibmalik10@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

Summary

Backend Developer with 1+ year of professional industry experience and 2 years of self-directed learning and project development. Skilled in building scalable backend systems, RESTful APIs, cloud-based applications. Experienced in authentication and authorization, microservices architecture, database design, caching strategies, third-party integrations, and DevOps practices. Proficient in Node.js, Express.js, React.js, PostgreSQL, MongoDB, Redis, Docker, and AWS, with a strong focus on building scalable, secure, and production-ready systems.

Technical Skills

- **Languages:** JavaScript, TypeScript
- **Backend:** Node.js, Express.js, RESTful, API Design, Microservices, Event-Driven Architecture
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis
- **Cloud & DevOps:** Docker, AWS, GitHub Actions, CI/CD Pipelines, Linux, Nginx
- **AI & Tools:** OpenAI API, LangChain, LLM Integration, RAG, Vector Databases (Pinecone)
- **Observability:** Prometheus, Grafana, Loki

Professional Experience

Backend Developer

Sept 2025 – July 2026

Quantum Communications Lab

Onsite

- Built and maintained a Collaboration Suite with features including user management, workspace management, role-based access control (RBAC), file sharing, and real-time collaboration.
- Configured Nginx as a reverse proxy and implemented application monitoring with Prometheus, centralized logging with Loki, and visualization using Grafana dashboards.

Backend Developer Intern

June 2025 – Aug 2026

Common Criteria Pakistan Lab

Onsite

- Developed backend modules for Inventory and Document Management Systems.
- Implemented secure file handling, access control, and Role-Based Access Control (RBAC).

Projects

GoLocal – Local Events & Booking Platform

[Live Demo](#) — [Repository](#)

React.js, Node.js, Express.js, MongoDB, Stripe

- Built a full-stack events platform with role-based workflows for Admins, Organizers, and Users.
- Implemented an admin approval workflow so event organizers can create events that go live only after admin review.
- Enabled organizers to create and manage events, and users to browse, book, and pay for events.
- Integrated Stripe for secure payment processing on event bookings.

File Storage System

[Live Demo](#) — [Repository](#)

Node.js, Express.js, MongoDB, Redis, AWS, React.js

- Built a scalable cloud file storage platform with secure upload and retrieval functionality.
- Integrated AWS S3 for storage and CloudFront for low-latency content delivery.
- Implemented OAuth authentication, Session Based, and Two-Factor Authentication (2FA).
- Integrated Stripe for subscription management and secure payment processing.
- Automated deployments using GitHub Actions on AWS EC2, Render.

EDOP – Enterprise Distributed Order Pipeline

[Live Demo](#) — [Repository](#)

Node.js, Express.js, PostgreSQL, Elasticsearch, RabbitMQ

- Developed a microservices-based order management platform using Node.js and PostgreSQL.
- Built an API Gateway for routing, authentication, authorization, and request management.
- Developed independent services for Authentication, Orders, Inventory, Payments, and Notifications.
- Implemented RabbitMQ for asynchronous communication between microservices.

Education

Bachelor of Science in Computer Science

PMAS Arid Agriculture University, Rawalpindi

Nov 2021 – July 2025

Rawalpindi, Pakistan
