Education

PMAS Arid Agriculture University, Rawalpindi

2025

Bachelor's in Computer Science

Technical Skills

Languages:	JavaScript, TypeScript
Backend:	Node.js, Express.js, REST APIs
Frontend:	React.js, HTML, CSS, Tailwind CSS
Databases:	MongoDB, PostgreSQL, Redis
Cloud/DevOps:	AWS (EC2, S3, CloudFront, IAM), Docker, Nginx, Git, GitHub Actions (CI/CD)
Observability:	Prometheus, Grafana
CMS:	Wordpress

Experience

Quantum Communication Lab (Full Stack Developer)

- Developed a Collaboration Suite for internal communication and productivity improvement.
- Built Authentication and User Service using Node.js, Express.js, PostgreSQL, and Redis.
- Improved backend performance and supported scalable system design.

Common Criteria Pakistan Lab (Full Stack Developer)

- Built Inventory Management System for asset tracking and reporting.
- Developed Document Management System (DMS) for secure file storage.
- Developed company website using WordPress.

Projects

File Storage System (Full Stack Application)

Source Code: [GitHub](#)

Live Demo: [Store My Files](#)

- Deployed backend on AWS EC2 and Render, frontend on Netlify and AWS CloudFront.
- Implemented CI/CD pipelines using GitHub Actions.
- Built secure file storage system using Node.js, Express.js, MongoDB, and Redis.
- Integrated AWS S3 for file storage and CloudFront CDN for performance optimization.
- Implemented OAuth authentication (Google, GitHub) and Two-Factor Authentication (2FA).
- Implemented Stripe subscription system for payments and plan management.
- Used Redis session management for secure multi-device control.
