Professional Summary

Backend Developer with 2+ years of hands-on experience, including 1 year of professional industry experience and 2 years of self-directed learning and project development. Skilled in building scalable backend systems, RESTful APIs, and cloud-based applications. Experienced in authentication and authorization, microservices architecture, database design, caching strategies, and third-party integrations. Proficient in Node.js, Express.js, PostgreSQL, MongoDB, Redis, and AWS, with a strong focus on developing scalable, secure, and production-ready systems.

Technical Skills

Languages: JavaScript

Backend: Node.js, Express.js, REST APIs, Microservices

Databases: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, CloudFront, IAM), Docker, Nginx, Git, GitHub Actions

Messaging & Search: RabbitMQ, Elasticsearch

Frontend: React.js, HTML, CSS, Tailwind CSS

CMS: WordPress

Experience

Backend Developer Intern

Quantum Communication Lab (Present)

- Built backend services for authentication, user management, and file sharing system.
- Developed RESTful APIs using Node.js, Express.js, PostgreSQL, and Redis.
- Improved system performance using query optimization and caching strategies.
- Contributed to backend architecture and deployment workflows.

Backend Developer Intern

Common Criteria Pakistan Lab (2025)

- Developed backend modules for Inventory and Document Management Systems.
- Implemented secure file handling, access control, and role-based authorization.
- Designed and maintained database schemas for scalable data storage.
- Supported deployment and maintenance of production applications.

Projects

File Storage System

Live Demo — Repository

Node.js, Express.js, MongoDB, Redis, AWS, React.js

- Built a scalable cloud file storage platform with secure upload and retrieval system.
- Integrated AWS S3 for storage and CloudFront for fast content delivery.
- Implemented OAuth authentication and Two-Factor Authentication (2FA).
- Added Stripe-based subscription and payment system.
- Used Redis for session management and performance optimization.
- Automated deployment using GitHub Actions and AWS EC2.

EDOP - Enterprise Distributed Order Pipeline

Live Demo — Repository

Node.js, Express.js, PostgreSQL, Elasticsearch, RabbitMQ

- Developed microservices-based order management system using Node.js and PostgreSQL.
- Built API Gateway for routing, authentication, and request management.
- Created services for Authentication, Orders, Inventory, Payments, and Notifications.
- Implemented RabbitMQ for async communication between services.
- Integrated Elasticsearch for efficient product search and Stripe for payments.

Education

PMAS Arid Agriculture University, Rawalpindi

2025

Bachelor of Science in Computer Science
