Portfolio

Professional Summary

Full Stack Developer with 1+ year of experience building web applications and backend systems. Experienced in developing APIs, implementing authentication and authorization, integrating third-party services, and deploying production-ready applications using modern cloud and DevOps practices.

Technical Skills

Languages: JavaScript, TypeScript

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication & Authorization

Databases & Caching: MongoDB, PostgreSQL, Redis

Cloud & DevOps: AWS (EC2, S3, CloudFront, IAM), Docker, Nginx, Git, GitHub Actions (CI/CD)

CMS: WordPress

Experience

Full Stack Developer Intern

Quantum Communication Lab (Present)

- Developed a Collaboration Suite to improve internal communication and team productivity.
- Built Authentication and User Service using Node.js, Express.js, PostgreSQL, and Redis.
- Improved backend performance and contributed to scalable system architecture.

Full Stack Developer Intern

Common Criteria Pakistan Lab

- Built an Inventory Management System for asset tracking and reporting.
- Developed a secure Document Management System (DMS) for file storage and management.
- Developed and maintained the company website using WordPress.

Projects

File Storage System

Live Demo — Repository

Node.js, Express.js, MongoDB, Redis, AWS (EC2, S3, CloudFront), React.js

- Developed and deployed a **full-stack cloud storage platform** with scalable architecture.
- Deployed backend services on AWS EC2 and Render, and frontend on Netlify and AWS CloudFront.
- Implemented **CI/CD pipelines** using GitHub Actions for automated deployments.
- Integrated **AWS S3** for secure file storage and **CloudFront CDN** for optimized content delivery.
- Implemented **OAuth Authentication** (Google, GitHub) and **Two-Factor Authentication (2FA)**.
- Developed **Stripe-based Subscription Management** for payments and plan upgrades.
- Utilized **Redis Session Management** for secure multi-device access control.

EDOP - Enterprise Distributed Order Pipeline

Live Demo — Repository

Node.js, Express.js, PostgreSQL, React.js, Elasticsearch, RabbitMQ

- Built a **Microservices-Based Order Management Platform**.
- Implemented an **API Gateway** for request routing, authentication, and service communication.
- Developed **Authentication, Inventory, Order, Payment, and Notification Services**.
- Integrated **Stripe** for secure payment processing and subscription handling.
- Integrated **Elasticsearch** for fuzzy search and improved product discovery.
- Utilized **RabbitMQ** for asynchronous and event-driven communication between services.

Education

PMAS Arid Agriculture University, Rawalpindi

2025

Bachelor of Science in Computer Science
